EDUCATION

The Ohio State University — Columbus, OH
Bachelor of Science in Mathematics — August 2026 - December 2029 (Expected)

Brecksville Broadview Heights High School — Broadview Heights, OH
Honors Diploma — September 2022 - May 2026

TECHNICAL SKILLS

Programming: Python
Mathematics: Mathematical Analysis; Mathematical Modeling; Statistics
Languages: Mandarin Chinese (Native); English (Fluent); German (Beginner)

RESEARCH EXPERIENCE

Math Cycle Program — September 2026 - Present
Topic: Theoretical Machine Learning and Topology
Mentor: Steven Raanes (Ph.D. Student)

- Study metric spaces, PAC learning, and VC dimension, focusing on probability distributions over hypotheses.
- Developed a proof of uniform continuity for a learning-algorithm-induced distribution map in the setting studied.

LEADERSHIP

Buckeyes Mathematical Modeling and Simulation Society
The Ohio State University
Founder and President — August 2026 - Present

- Founded and lead a student society for mathematical modeling, simulation, and interdisciplinary applications.
- Coordinate members' preparation for the Mathematical Contest in Modeling (MCM) and Interdisciplinary Contest in Modeling (ICM).

WORK EXPERIENCE

Mathematics and Statistics Tutor — Online
October 2025 - Present

- Tutored SAT Math and AP Calculus BC (Oct 2025 - May 2026), emphasizing reasoning and problem-solving.
- Provide instruction in introductory statistics, explaining concepts and guiding students through problems.

Farinacci Pizza — Brecksville, OH
Kitchen and Front Counter Team Member — November 2023 - June 2024

- Prepared pizzas, assisted front-counter customers, washed dishes, and maintained clean kitchen work areas.

PROJECTS

CampusPilot - HackOHI/O 2026 — Columbus, OH
Hackathon Prototype and Ongoing Development — October 2026 - Present

- Developed a campus task-planning application with three teammates using React, TypeScript, and Python.
- Tested scheduling algorithms and verified application functionality through automated test cases.
- Post-hackathon: developing quantum optimization extensions using IBM Qiskit; room-booking functionality remains in development.
